July 26, 2006

TO: Dr. Lance Garrison,  
Protected Resources Branch

FROM: Dennis Lee,  
SEFSC Observer Coordinator

SUBJECT: Longline gear Incidental Take summary for quarter 2, 2006 (**revised**).

The Miami Laboratory Pelagic Observer Program (POP) is providing you with a summary report of the incidental take of marine mammals, turtles, and birds that have been recorded by observers aboard longline vessels for April 1 to June 30, 2006. The POP completed an overall coverage rate of 7.6% of the selected pelagic longline fleet for this quarter (Table 1). During the quarter, observers recorded one (1) marine mammal (1-Pilot Whale-alive) and no (0) seabirds, in addition to 15 sea turtles (10-leatherbacks-alive; 5-loggerheads-alive).

Enclosed you will find the original Incidental Take (IT) form and photocopy of the Haul log for the single animal associated with the regular longline coverage. The POP will maintain copies of the IT logs in our files until you have completed your data review or entry. I strongly recommend that you return the original IT forms with any changes (in red and initialed) to the POP staff when you have completed your review.

In closing, in addition to the POP reporting of Protected Resource (PR) species recorded during observed longline fishing, observers have been requested to inspect the turtle handling and dehooking gear available aboard the vessels as a requirement of the 2004 Biological Opinion (BO). Since you are the point-of-contact (POC) person overseeing the Miami BO tasking, I am providing you with copies of the Miami PR Turtle Gear check list forms either filled out by the observer or by POP staff during debriefing from quarter 2. A PDF file will be created and will be posted on the SEFSC-POP secured website. Although it is not clear how this information will be processed, the originals will remain on file in the observer office, room 314. Analyses associated with Turtle Take Estimates (TTE) or the Net Mortality Ratio (NMR) mentioned in the 2004 BO are not provided as the POP staffing does not have the expertise to provide these results. Finally, the POP observers recorded no sawfish catches during the quarter; this species is not likely to occur in the pelagic environment.

Table 1: Percent coverage (by sets),the incidental take of Protected Resource species (turtles, mammals, seabirds), and hook effort summarized by geographical area for April 1 - June 30, 2006. (A=Alive, D=Dead, LB=Leatherback, LH=Loggerhead, U=unknown). **Revised**

AREA	REQUIRED		TURTLES		MAMMALS		BIRDS	
	TOTAL SETS OBSERVED	8% COVERAGE	A LB/LH/U	D	A	D	A	D
GOM-2	99(7%)	113	5/ 2/ 0	0	1	0	0	0
FEC-3	12(8%)	11	1/ 1/ 0	0	0	0	0	0
SAB-4	36(8%)	35	0/ 0/ 0	0	0	0	0	0
MAB-5	3(1%)	14	0/ 0/ 0	0	0	0	0	0
NEC-6*	<u>15(8%)</u>	<u>0</u>	<u>4/ 2/ 0</u>	<u>0</u>	<u>0</u>	<u>0</u>	<u>0</u>	<u>0</u>
TOTAL	165(7+%)	173	10/ 5/ 0	0	1	0	0	0

Hook effort Summary:

<u>Area</u>	<u>Hook effort</u>
GOM	75,456
FEC	4,523
SAB	22,045
MAB	1,735
NEC*	<u>12,773</u>
TOTAL	116,532

\*Note: A third quarter selected vessel departed port near the end of quarter 2 and made three sets in the NEC area prior to July 1. The haulback of the third set took place on July 1. For consistency, this set effort and any associated takes will be counted in quarter 3, 2006.
